

Vertical Grain Heart Pine

Vertical Grain Heart Pine is the very best grade of heart pine flooring available. This product contains approximately 95% heartwood. The beautiful, straight, tight grain is 90-95% quartersawn, with very occasional dime size knots, small nail holes, and a very high growth ring density, all of which work together to create a truly elegant premium pine floor.

This stunning flooring is the finest we offer and contains approximately 95% heartwood. Due to the difficulty in quartersawing, this flooring is not available in widths over 5 inches.
